

The CS-761W is a compact 2-way weatherproof speaker system designed for high efficiency, high power input handling capacity, and is a high intelligible speaker suited for public address announcement and BGM application in outdoor environments. The external speaker component is finished to ensure the unit's weatherproof ability, and special paint coat prevents color degradation, ensuring its long-lasting exterior condition. This model is designed with a rotary switch that facilitates hassle-free impedance change.

Numéro de l'article:CS-761BS-W
Alternative products: CS-761BS-B

Specifications

Sensibilité (1 W à 1 m)	100 dB
Réponse en fréquence	100 Hz - 20 kHz
Niveau de pression acoustique maximal	117 dB (60W, 1m)
Fréquence de croisement	2500 Hz
Finition	ABS, Tôle d'acier, Acier inoxydable, Traitement de surface, Peinture époxy, Blanc,
Température de fonctionnement	-10 °C to +50 °C (14 °F to 122 °F)
