# CONFERENCE SYSTEM          TS-780 SERIES

## PRECAUTION FOR USE OF THE WIRED CONFERENCE SYSTEM TS-780 SERIES
Depending on production date, there are multiple version of Wired conference Central unit (TS-780) and Wired conference Chairman/Delegate units (TS-781/TS-782) that differ in specifications used in TS-780 Wired conference system, even though they have identical model numbers.
Due to specification changes, please take note that units of different version can not be used in the same system.

## 1. Identifying version based on version control number
Please confirm the version control number printed at Bottom-Right side of name plate label located on rear side of Central unit (TS-780) and bottom side of Chairman/Delegate units (TS-781/TS-782) as below illustrations.

on Name plate label

## 2. Connecting Central unit with Chairman / Delegate units
Since noise may occur in system,  please follow below system connection instructions.
Please be noted that Chairman/Delegate should be the same version.

| Central unit | Chairman / Delegate Units | ✓／✕ |
|---|---|---|
| No Version | No Version | ✓ |
| | E00 | ✕ |
| | E01 or larger | ✕ |
| E00 or larger | No Version | ✕ |
| | E00 | ✓ |
| | E01 or larger | ✓ |

*No Version: There is no control number

*✓: System connection are possible
✕: System connection are not possible
