

The loop monitor module can monitor up to three speaker line loops on break and short circuit when the speaker lines are equipped with the loop isolators VM-300IS. In case of a failure, it will be reported to the system and can be indicated. Each speaker line can be equipped with up to 60 loop isolators VM-300IS. The loop monitor module consists of pre-assembled PCBs for an easy DIN rail mounting (snap-in clamps).

Article number: VM-300IM-EB QJ

Specifications

Power source	24 V DC (supplied from VX-2000DS)
Control output	3x fault per speaker line
Input / Output	amplifier in x3, loop in x3, loop out x3
Dimensions (W x H x D)	125 x 105 x 49 mm
Dimensions (ø x D)	x 49 mm
Operating temperature	-10 to +55°C

VM-300IM-EB
